
Slope of the regional nh219 association on background Tw0; bars are 1 SE. Sign depends on which regions enter.

Expressing exposure in hours rather than SD removes the scale artefact; the slope remains negative throughout.

all 135 regions: median 0.00110 [-0.00015, 0.00211]
non-zero >=10% (30 regions): median -0.00392 [-0.00725, -0.00055]
